

How_test_Reinit_Activity_in_Android_Emulator

Create Android Virtual Device (AVD)

- Name : *Tablet1280x800-A7-64*
- Device : *10.1" WXGA (Tablet)(1280x800: mdpi)*
- Target : *Android 7.0 - API Level 24*
- CPU/ABI: *ARM (arm64-v8a)*
- Skin : *Skin with dynamic hardware controls*
- Front Camera: *Emulated*
- Back Camera: *None*
- Memory Options: *512*
- Internal Storage: *200*
- Snapshot: *uncheck*
- Use Host GPU: *check*
- Once we have created the emulator, we launch the application and keep the square button pressed. We go to multiwindows mode and modify the size of our application until we get it to restart the activity.
- So we can test if it works correctly.
